Subject: SkyeTek M4, M7, M9 and SkyeReader SuperNova End of Life

Dear Valued Customer,

JADAK, a business unit of Novanta Corporation, specializes in HF and UHF RFID products and services that help customers solve unique inspection, tracking, scanning and documenting challenges. As JADAK continues to grow, the company has branched out into additional markets and offers solutions for the most demanding applications.

Since the acquisition of SkyeTek and ThingMagic in January 2017, JADAK now has one of the industry's widest arrays of RFID products. As we are now able to offer a more robust product portfolio, and because some of the products previously offered have become more difficult to source parts, the following SkyeTek HF RFID products are end of life:

End of Life Products	Description / Product Part Numbers Including:
SkyeModule M7	SM-M7-MH
SkyeModule M9	SM-M9-MH
	SM-M9-CF
SkyeReader Super Nova	SR-SN-00
	SR-NV-00
SkyeReader M4	SM-M4-MH
	SM-M4-MH-2.4
	SM-M4-MH-2.4-0615-T0
	SM-M4-MH-2.4-067C-T0

JADAK will continue to honor existing one-year warranties. If you require additional product inventory, please contact our sales team by May 31, 2017, to discuss options.

Note that these products will not be available for shipment to Europe after the European Union Radio Equipment Directive takes effect on June 12, 2017.

Best regards & Mit freundlichen Grüßen

Meshed Systems GmbH

Dr. Michael E. Wernle, Geschäftsführung
